Benefits of Factory Finish with SoPro® & Edmund Allen Lumber Co.

- Best value per board foot
- Boards arrive at the job site fully coated and free of scuffs, mars or shiners
- Protects against damaging UV rays immediately upon installation
- Provides long lasting color
- Resists blistering and fading in extreme heat
- Highly flexible formula resists cracking and peeling during freeze thaw cycles
- Extreme durability provides protection against moisture from snow and ice
- Applied in a controlled environment meeting specific standards
- No weather delays to slow down your project
- Custom color matching available

Don't compromise quality when it comes to your home. Finish it with the best. Mason's Select SoPro applied by the best and most experienced prefinisher, Edmund Allen Lumber Co.

More reasons why Solid Color Professional Finish is the best ...

- *Each color is achieved from a factory-ground pigment base which will yield outstanding color retention and better hiding characteristics:*
- *High Solids Content:*
- *Self Cross Linking Resin:*
- *Pure Titanium Dioxide & Iron Oxide Pigments:*
- *Polyethylene Wax:*
- *Excellent Pigment to Binder Ratio:*
- *Mildew Resistant Finish:*

More consistent color from batch to batch

50% solids for excellent coverage

Anchors the product for superior adhesion & durability

No extender pigments - contains 25% higher pigment volume than most factory finishes

Provides anti-blocking and additional mar and scuff resistance

For unsurpassed hide and long term pigment adhesion

The combination of a mildew resistant additive and eggshell sheen keep the coating's surface beautiful and mildew free

LET EDMUND ALLEN "FINISH" YOUR PROJECT WITH THE BEST.
